Technical details

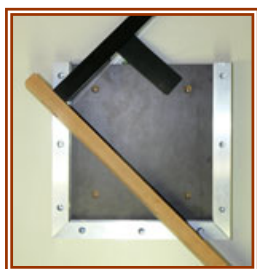

We use firm zinc-plated fixing-pins, because the Wheel of Fortune mostly is touch on the fixing-pins to move it. The stand has been tested for many years. It is firm and completely foldable. We use a robust ball-race for mounting the wheel. The strong vulcanite – stopper are produced for the long-lasting usage. The Wheel of Fortune exists of two bolted plates. The face-plate can be printed two-sided so that one can use them as turning plates. Because of the bolted plates one can not see the ball-race anymore and the design will not be bothered. The Wheels of Fortune are produced in accordance with fire protection classification DIN 4 102-B1 ([Certification PDF](#))

Delivery time

The normal delivery time is about 7 days. We often have Blank Wheels of Fortune with a diameter of 1m and 12 or 24 or 36 fixing-pins in stock, so we can dispatch them within 24 hours (if you order it until 16 o'clock). If you want to have printed Wheel of Fortune with your personal design the delivery time will be about 14 days from the correct data input. Gladly we can offer you an **express delivery** within 3 days from data input or with our design (also with your logo) against an extra charge.
